

EGY FALAT HARMÓNIA • A PIECE OF HARMONY

abonett

About us

The 100% Hungarian owned Abonett Ltd. was founded in 1949. One of our best known products is the Abonett Crackerbread family, which has been present on the shelves of the Hungarian food stores since 1986.

The keystone of our approach is to apply the results of dietetics in order to produce healthy products. No genetically modified (GMO), or chemically treated grain is allowed to get into our products, and we refrain from using artificial additives.

We develop and manufacture our products using modern technology and advanced quality assurance systems (HACCP, IFS).

Abonett is always “ready at hand”, whenever we wish to have a healthy breakfast, a quick snack, or a healthy diet dinner, it can be a complete meal, or an additional treat anytime. In order to experience the joy and the beneficial effects of cereals right away, at any time of the day, beside crackerbreads, Abonett created the **SlimUp** product family. Its members are: the **Sandwich**, the **Snack** and the **Millet balls**.

Abonett crackerbreads

Crispy breads made of whole grain. Their high fiber content helps healthy digestion. The Abonett extruded breads are suitable to meet specific dietary requirements, so they can be a great help in establishing **low-calorie**, (e.g. slimming diet) **low salt and low sodium diets**, **high-fiber diets**, **gluten free** and **yeast free** diets.

- original
- bran
- rye
- wheatgerm
- pizza
- oat

Organic crackerbreads

The original and corn crackerbreads are available in organic version, too. These products are made of raw materials, coming from controlled organic farming. The purity and reliable quality of our products are guaranteed by the certification HU-ÖKO 01. Our organic corn product is also gluten free.

Gluten free products

Our other important development is the gluten free bread, made to meet the requirements of those, living with food allergies. While keeping the beneficial qualities of the standard Abonett breads, it offers an alternative to people with coeliac disease. These products are licenced by the Hungarian Coeliac Society within the European Licensing System and are manufactured according to the AOECs Standard's requirements.

- gluten free
- millet
- corn
- bio corn

SlimUp products

Sandwich

Crispy bread seasoned with natural flavorings, free from preservatives and artificial additives, filled with delicious cheese cream and herbs filling, with a long shelf life, without refrigeration. It is made exclusively with whole grains, so it offers the beneficial physiological effects of the Abonett breads, while meets the requirements of a modern, up to date diet. It is ideal for low calorie, appetite suppressant small meals, or for excursions.

- cream cheese and herbs
- cream cheese and mexican

Snack

Crispy delicacy made exclusively from whole grain, seasoned with natural flavorings, free from preservatives and artificial additives. Thanks to its low fat and energy content, (it contains 88% less fat than the traditional chips) it gives the joy of flavorsome snacking to health-conscious consumers too.

- onion and yogurt
- red pepper

Millet Ball

Even when you have a snack, the extruded millet balls have a beneficial effect on your body's acid/base balance, thanks to the millet's alkalizing effect. Besides, they're the children's great favorite.

- natural
- peanut
