

CUSTOMS WITHOUT BORDERS

CLARE

In 2018, we are presenting Clare: a customs clearance software that makes everything automatic – thus simplifying the whole customs clearance process from the production to the distribution of the goods. Our goal is to create Europe's leading customs clearance software. We aim to create a system where everything and everyone is connected, and the process is smoother and most importantly, automatic.

RÉGENS Plc.

Régens is an international software and web developer company with offices in Budapest and London. We specialise in bespoke software development, and we feel that our greatest professional achievements are all in connection with customs clearance solutions.

WHY CHOOSE CLARE?

Make everything automatic

Easy integration
to ERP systems

Connecting everything
and everyone

Full control over the
customs clearance process

Up-to date with the
current legislation

Online customer service

Multiple platforms
including a mobile app

CHOOSE THE MODULES YOU NEED

Thanks to the flexible design of our application, you have the opportunity to purchase only those modules that you really need.

SAD: Basic module supporting the management of single administrative documents

Supporting the completion and printing of administrative documents used during standard customs procedures as well as communication with the authorities.

NCTS module: basic module supporting the NCTS procedure

Supporting the notification of departures and arrivals in the standard and simplified transit procedure to the customs authority

Simplified procedures module

Supporting the simplified procedure for the registration of declarants

Customs warehousing module

Supporting the standard or simplified customs warehousing procedure including the stock management of goods subject to the customs warehousing procedure

Temporary storage module

Ensuring the management of the temporary storage register.
